CT, Spain's best engineering services company to work in for the third year in a row

CT ranks 50 in the 'Best Companies to Work In' list compiled by the magazine *Actualidad Económica*. CT Ingenieros makes the list for the third consecutive year as the best engineering services company.

Madrid, October 5th 2018

For the third year in a row, the engineering services company CT holds a place in the 'The Best Companies to Work In' list, compiled by the magazine *Actualidad Económica*. In this 2018 edition, CT climbs three positions from last year's ranking, consolidating itself among the 50 best companies to work in in Spain. CT is once again the first engineering services company in this classification, in an edition that highlights the company's ability to recognize its employees' talent and provide them with training programs that suit their needs.

The "Best Companies to Work" ranking bases its score on an extensive and rigorous questionnaire supervised by independent consultants and experts in human resources. The methodology measures variables like work conditions, career planning, undesired turnover, retributions, social benefits, settlements or investment in training. What's more, this ranking requires various employees to evaluate the Company on variables such as corporate values, management, and work conditions. An evaluation that leads CT to share its position with recognized brands from other sectors, such as Bankinter or Everis.

About CT

CT provides engineering services to the aeronautical, naval, automobile, railway and energy sectors as well as to industrial plants, architecture and construction. All areas in the life cycle of a product are covered, from design engineering to manufacturing and even post sales engineering support. CT, with over 1,500 employees, has offices in Spain, France, Germany, Portugal, the United Kingdom and India.
